Senior QA Engineer with over 7 years of experience in API and automation testing, including mobile and performance testing. Certified in ISTQB Foundation, ISTQB Agile Tester, and Professional Scrum Master I, focusing on technical excellence and quality results.

My experience in the startup environment has provided me with a unique perspective on agility, innovation, and problem-solving.

Capable of leading teams, coaching other testers, and adapting to changing environments in agile teams using Scrum, I contribute to seamless collaboration and effective teamwork with international colleagues while being fluent in English.
